Application/Control Number: 09/010,193

Art Unit: 2164

This application contains claims directed to the following patentably distinct species:

Group I: A method and system for processing payment requests and transmitting payment instructions to a merchant, as defined in claims 56-58 and 60-62 and defined in class 705, subclass 64.

Group II: A method and system for receiving a set of payment requests and processing at least one of: identifying a payee; determining a remittance center; and altering an account number, as defined in claims 59 and 64 as defined in class 709, subclass 238.

Group III: A system for transmitting payment requests and processing at least one of: merchant identification; account ranging; and account scheming, as defined in claims 63 and 65, as defined in class 707, subclass 104.1.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claims are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Application/Control Number: 09/010,193

Art Unit: 2164

Because these inventions are independent or distinct for the reasons given above and

Page 3

there would be a serious burden on the examiner if restriction is not required because the

inventions have acquired a separate status in the art due to their recognized divergent subject

matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include (i) an

election of a species or invention to be examined even though the requirement be traversed (37

CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve

a right to petition, the election must be made with traverse. If the reply does not distinctly and

specifically point out supposed errors in the restriction requirement, the election shall be treated

as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably

distinct, applicant should submit evidence or identify such evidence now of record showing the

inventions or species to be obvious variants or clearly admit on the record that this is the case. In

either instance, if the examiner finds one of the inventions unpatentable over the prior art, the

evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

Any inquiry concerning this communication should be directed to Sam Rimell at

telephone number (571) 272-4084.
